WWW.BMSPORTS.COM

Introduction

Hello,

We would like to benefit from this occasion to thank our faithful customers. BM Sports Distribution was celebrating its 30 years of existence in 2018. Your support and your constructive comments made so that this small Canadian company continue to grow.

With an aim of meeting the needs for our growing customers, BM Sports Distribution acquired, in October 2012, the products of Solutan. This company was well known, in Quebec especially, for its quality in tanning products. From now on, taxidermists and tanneries all across Canada will benefit of those excellent tanning products.

BM Sports Distribution is proud to be the exclusive distributor of Royal Robillard's Whitetail Deer Shoulder Forms. Royal won a 1st place ribbon in Pre-Sculpted Division at the 2016 Quebec's Taxidermy Show with one of those forms. Try it, you'll love it.

During last months, we also signed agreements of volume with major carriers (small parcels, heavy parcels, transport on pallet, etc). This will allow our customers to be given transport charges at reduced prices.

Always with an aim of offering the best products at the best prices, we also made the introduction of new products. We invite you to read our new catalogue attentively and to make new discoveries there.

Once more, we invite you to regularly visit our Web site www.bmsports.com, in which we will add other new products during next months. Although we make all the efforts necessary in order to maintain our prices as low as possible, we also invite you to visit our Web site in order to obtain the last updates of our price list.

Vicky Leblanc and Marc Listopad
BM Sports Distribution's owners

Breakthrough Manuals and Booklets

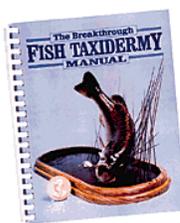

FISH PAINTING ENCYCLOPEDIA

"Fish Painting Encyclopedia" contains complete airbrush painting procedures for most commonly mounted fish. Detailed black and white diagrams show step by step color application. (No other photographs.) 156 pages.

BP1001 39.95 \$CAD

FISH TAXIDERMISTRY MANUAL

Features most of the Fish Mounting Methods in use today. This book explains the techniques of the top fish taxidermists in the world from reference, skinning, mounting, to finishing techniques. 162 pages.

BP1006..... 39.95 \$CAD

WATERFOWL AND BIRD FINISHING MANUAL

This manual includes 75 paint finishing schedules for the feet, legs and bills of most North American waterfowl and most commonly mounted upland game birds. Each finishing schedule explains the exact airbrush painting instructions with clear black and white diagrams showing the areas of color application. 192 pages.

BP1002.....39.95 \$CAD

HABITAT AND EXHIBIT MANUAL

Learn the secrets of America's top wildlife artists for creating beautiful habitat scenes for their mounts and carvings. Learn the art of working with resins, foams, epoxies, maches, and dozens of other materials to create convincing artificial water, snow, earth, rocks, and vegetation to enhance your work. 156 pages.

BP100739.95 \$CAD

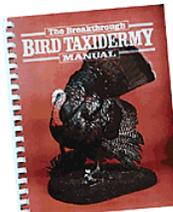

WHITETAIL/MULE DEER TAXIDERMISTRY

A complete start to finish comprehensive detailed account of how two time World Champion Sallie Dahmes mounts Whitetail and Mule Deer shoulder mounts. Everything from skinning to finishing procedures are covered with clear photographs and diagrams illustrating every step. 160 pages.

BP1003.....39.95 \$CAD

BIRD TAXIDERMISTRY MANUAL

This step-by-step manual includes all the information necessary to mount beautiful birds. This book shows all of the current taxidermy techniques, including mounting on wrapped bodies, carved bodies, rigid foam manikins, and flex manikins. 156 pages.

BP100839.95 \$CAD

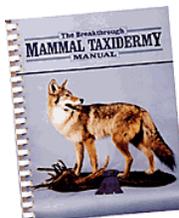

FISH FINISHING SYSTEM MANUAL

"The Tom Sexton Fish Finishing System" contains the exact detailed procedures that World Champion Fish Taxidermist Tom Sexton uses for finishing fish. In this book, he explains all the techniques, procedures and secrets necessary for creating world-class finishing jobs on fish. 116 pages.

BP1004.....39.95 \$CAD

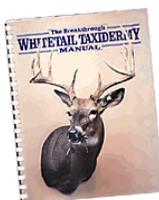

MAMMAL TAXIDERMISTRY MANUAL

This is a comprehensive book that features several different methods for mounting life size mammals, as well as illuminating chapters on tanning, studio design, skull preparation, altering manikins, base construction, and finishing techniques. 160 pages.

BP100939.95 \$CAD

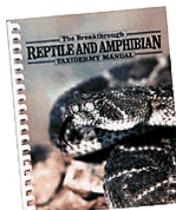

WHITETAIL TAXIDERMISTRY MANUAL

Features many of the preferred methods of the top whitetail deer taxidermists in the country. The clear step-by-step photos and easy-to-understand text explain how to professionally mount a whitetail using current techniques. 112 pages.

BP100529.95 \$CAD

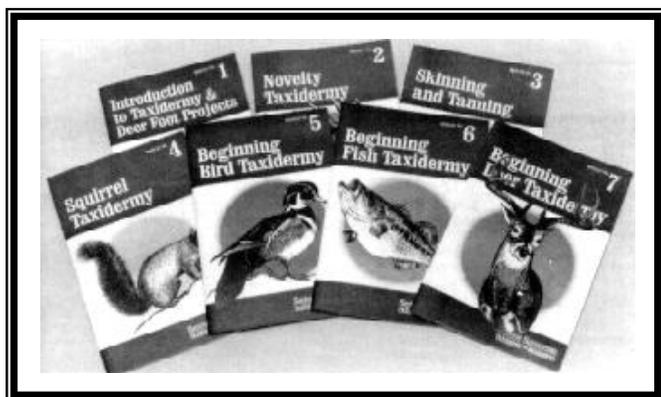

REPTILE AND AMPHIBIAN MANUAL

The recent addition to the Breakthrough Wildlife Art Manual library, this is the definitive source for modern reptile and amphibian taxidermy information. Written by Ken Edwards with contributions from the world's foremost reptile experts. 172 pages

BP1011 39.95 \$CAD

Serious Sportsmen TAXIDERMISTRY FOR BEGINNERS

Taxidermy has changed dramatically in the past decade. Methods that were common ten years ago have slipped into oblivion as new technology has produced easier and more effective methods. There is only one booklet course that trains beginning taxidermists in this new technology: "Serious Sportsmen Taxidermy for Beginners." This set of seven booklets includes 29 lessons that take you from the basics of skinning and tanning, all the way through full body mounts of squirrels, fish, birds and big game shoulder mounts. Each lesson is profusely illustrated with dozens of clear black and white photographs and diagrams to guide you every step of the way. It is written in plain English and does not require any previous taxidermy knowledge to understand.

You'll learn not only what steps to follow to complete a project, but the reason for every procedure. You will develop an understanding of the principles of taxidermy while working on projects that become increasingly more challenging.

If you want to get started in the fascinating world of taxidermy, there's no better place to start than the Serious Sportsmen Taxidermy course. It is also ideal to use in conjunction with our video course listed on the following pages.

BP3000 (Seven Booklets)set 38.95 \$CAD

BOOKLET NO. 1: INTRO TO TAXIDERMISTRY & DEER FOOT PROJECTS

Lesson 1: Introduction to Taxidermy
Lesson 2: Skinning a Deer Foot

Reference Material

REFERENCE CASTS AND PHOTOS

REFERENCE CASTS

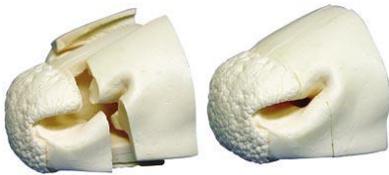

REFERENCE EYE CASTS

An outstanding aid for setting eyes and sculpting eyelids. These casts are manufactured from a "tough" break-resistant resin with a molded-in hanger wire for convenience. Shows a hair-on view of the upper and lower eyelid, nictitating membrane and tear duct areas. Despite the low cost of these reference casts, an investment in them will reap big dividends in the quality of your taxidermy work. Approximately 3" diameter.

R55 E (Whitetail Eye Cast)each 15.95 \$CAD

DEER NOSE CAST (Bryan Eppley)

The most accurate whitetail nose reference available. Can be disassembled in 3 pieces to reveal every facet of nasal detail. Excellent detail of the entire inner nasal passage. A must for your reference library.

R55 W.....each 44.95 \$CAD

REDI-MOUNT CHANGE-OUT HEADS

Redi-Mount head is the perfect reference tool for instruction. If you are a beginner, there is no better way to learn anatomy from the outset!

RM 720-BB (Head w/both ears back).....each 119.95 \$CAD
RM 720-FF (Head w/both ears forward) each 119.95 \$CAD
RM 720-FB (Head w/right fwd, left back)each 119.95 \$CAD
RM 720-BF (Head w/right back, left fwd)each 119.95 \$CAD

REFERENCE CASTS

SALLIE DAHMES WT DEER REFERENCE PHOTOS

Beautiful, full-color reference photos of the whitetail deer. The set includes photos taken from various angles with incredible close-up of the nostrils and other areas of the nose, eye, lips, ear muscle and general facial anatomy. Includes ten (10) beautiful oversize color prints (4"x 6") printed on Kodak photographic paper. Prints are held in a plastic comb binder for ease of use. You will use this set with every deer mount.

BP901 Set of 10 full-color photoseach 12.49 \$CAD

EAR CASTS

Muscle groups are accurately detailed in relationship to the ears and antlers.

REF-FORW (ear forward)each 29.95 \$CAD
REF-BACK (ear back).....each 29.95 \$CAD

EYE SETTING TOOL

Achieve the correct eye shape every time on every mount. Simply place the template for the eye set in position and lay your eye setting material to the template.

CC-241 (Deer medium).....39.95 \$CAD
CC-242 (Deer large).....39.95 \$CAD

 925-100 (100 blades, no dispenser)...each 38.95 \$CAD

IRIS SCISSORS

Thin, sharp, curved blades permit delicate cutting during skinning and fleshing operations for small fish and birds. Good for cutting small muscle and tendons, intricate work around skulls and eye sockets.

- MR30019.50 \$CAD

Tools

PIRANTA EDGE KNIFE

For field dressing and skinning deer, elk, bear, moose, etc. It's always sharp, just replace the blade and go. With easy-to-find blaze orange handle.

- XT-60EDGE (fits blades #SB60XT).....44.95 \$CAD**
- XT-60EDGE KIT(1)(knife+12 blades+holster).....54.95 \$CAD**
- XT-60EDGE KIT(2)(knife+12 blades).....49.95 \$CAD**
- SB60XT-100 (Box of 100 blades)44.95 \$CAD**
- SB60XT-12 (pkg. of 12 blades).....9.95 \$CAD**

PIRANTA ZYTEL KNIFE

The Piranta Zytel skinning knife features a longer and wider handle, yet uses the same super-sharp 60XT blades. Just like the original. It's the sharpest knife you'll ever use!

- XT-60ZYTEL (fits blades #SB60XT).....44.95 \$CAD**
- XT-60ZYTEL KIT(1)(knife+12 blades+holster)....54.95 \$CAD**
- XT-60ZYTEL KIT(2)(knife+12 blades).....49.95 \$CAD**
- SB60XT-100 (Box of 100 blades)44.95 \$CAD**
- SB60XT-12 (pkg. of 12 blades).....9.95 \$CAD**

PIRANTA 'A BOLT' KNIFE

Feel the power of the NEW Piranta 'A BOLT' hunting and skinning knife. Featuring stronger, thicker SB60A blades and a larger handle for improved grip, in easy to find blaze orange.

- XTI-60BOLT (fits blades #SB60A).....49.95 \$CAD**
- XTI-60BOLT KIT(1)(knife+12 blades+holster).....59.95 \$CAD**
- XTI-60BOLT KIT(2)(knife+12 blades).....54.95 \$CAD**
- SB60A-50 (Box of 50 blades)39.95 \$CAD**
- SB60A-12 (pkg. of 12 blades).....14.95 \$CAD**

PIRANTA KNIFE HOLSTER

Carry your Piranta and up to 12 blades in the rugged black nylon knife holster. Features 2 pockets inside, one for your knife and one for your blades.

- XT-60HOLSTER (black nylon).....9.95 \$CAD**

BARACUTA EDGE FILET KNIFE

Same great concept as the Havalon Piranta, but larger and longer. Overall length is 11 inches, yet it weighs only 3 ounces. Fits blades #SB127XT.

- XTI-127EDGE KIT(1)(knife+5 blades+holster).....79.00 \$CAD**
- XTI-127EDGE KIT(2)(knife+5 blades).....70.00 \$CAD**
- SB127XT-5 (5 blades).....22.00 \$CAD**
- SB127XT-20 (20 blades).....69.00 \$CAD**
- XTI127HOLSTER (holster).....9.95 \$CAD**

Tools

JIM HALL FISH FLESHING TOOL

Original design removes flesh from fish without tearing the skin.

FP192each **22.95 \$CAD**

JIM HALL MAMMAL FLESHING TOOL

One side of this blade has serrated teeth, while the other side has a flat edge which can be sharpened. Based upon the design of the successful fish fleshing tool, this hand-held scraper is used to remove meat, flesh and fat from raw, salted, or pickled skins. Also great for working a tanned hide for added softness and stretch.

JHT103.....each **22.95 \$CAD**

MEMBRANE SEPARATOR

This flat-bladed (very thin but strong) tool is excellent for slipping under the shoulder girdle "cleithrum" to separate fragile fish skin membranes from bony areas without tearing. Also good for cleaning the cheek pockets on smaller fish. Designed by premiere cold-water taxidermist Jim Hall.

JHT100.....each **17.95 \$CAD**

HOOK SCRAPER

This handy tool, designed by Jim Hall, removes meat from the cheek pockets and tail of most sizes of fish. Similar to the membrane separator (previous page) but with a curved tip.

JHT101.....each **15.50 \$CAD**

BRAD & PIN SETTER

Magnetic head holds pin or brad in place. Wooden handle.

BR5.....each **26.00 \$CAD**

BIRD & SMALL GAME SKINNING GAMBREL

Three-chain and hook gambrel is perfect for suspending small game and birds over your workbench as you skin them. (We call it "The Third Hand.")

JHT102each **10.50 \$CAD**

EAR OPENERS

Non-Rusting Alloy

MR200each **34.50 U\$**

GEORGE ROOF TAXI-TUK

George Roof designed a taxidermy tool for tucking hides into lifesizedmannikin relief cuts. The tool is called the TaxiTuk tool and no taxidermy shop mounting lifesize animals should be without this little gizmo. It will never puncture or cut your hide, and when you tuck the skin in a slot, it will stay in place when the tool is removed.

MR215each **19.50 \$CAD**

GAMEHEAD MEASURING TAPE

Every wildlife artist needs one of these non-stretching, fiberglass-reinforced tape measures. Use it to take vitally important measurements of your subject. These tapes are 36" in length. Wipes clean easily.

GMTeach **3.50 \$CAD**

FARRIER RASP

This heavy-duty, industrial-quality rasp is extremely useful around the wildlife artist's studio. Very helpful when modifying forms.

FR.....each **39.95 \$CAD**

Tools

HIDE PULLER

Constructed from maple hardwood with six pronged teeth on one end and corrugated rubber on the other.

HP.....each 24.95 \$CAD

STOUT RUFFER

This handy tool scratches the surface of foam mannikins without removing the detail. Hundreds of teeth uniformly roughen to create an ideal surface for hide pastes to adhere to. The Stout Ruffer can also be used to alter mannikins like a rasp.

STR 100.....each 42.00 \$CAD
STR 101(Replacement pad for STR 100)..each 29.50 \$CAD
SLR2(Slim Ruffer).....each 42.00 \$CAD

OPTI-VISOR

The Opti-Visor is a precision binocular headband magnifier which allows you to see all objects closely, while leaving both hands free to work. The lenses are optical glass, ground and polished to precise standards. The visor tilts out of your way when not needed, and is at your fingertips when you want magnification. The adjustable headband is lightweight and comfortable, and the Opti-Visor can be worn over regular glasses. Magnification of lens 3 1/2 times.

MODELING TOOL

One end of this hardened steel tool has a dull point for taxing skin, while the other has a rounded end for smoothing and shaping. Absolutely perfect for critical eye and nose work. Center of handle is non-slip rubber.

MR230each 25.95 \$CAD

EYE MODELING/LIP TUCKING TOOL

This new custom modeling tool was designed and manufactured by 1995 World Champion whitetail deer taxidermist Gene Smith of North Carolina. Perfect for all game head work, it is manufactured from stainless steel which will not rust or tarnish like brass and will not bend or break like wood or plastic tools. One end has a lip tucking tool made in the ideal shape for tucking skin in thin slots. It is slightly rounded to prevent any damage or tearing of the skin. The other end of this handy tool is a flat rounded modeling tool, perfect for shaping eyelids. A clear plastic handle provides a comfortable, non-slip surface for pinpoint control. Once you try this new tool, you will never want to mount a game head without it!

MR231each 33.95 \$CAD

GENE SMITH MODELING TOOL

Here's a brand new stainless steel modeling tool developed by 1995 World Champion Whitetail deer taxidermist Gene Smith of North Carolina. Manufactured from stainless steel, it is a super thin, long and slender modeling tool which allows you to reach areas that have been unreachable in the past. Now you can model areas deep inside fish throats; up against the crusher teeth; down within deep ear canals on gameheads; inside lip and gum lines; and deep inside nostrils. The rounded, thin-bladed ends are perfect for modeling epoxies, waxes or polyesters. One end has a flat modeling surface while the other is gently curved. The overall length of 8" makes this one of the longest modeling tools around. Stainless steel construction for years of maintenance-free use .

FLESHING MACHINE BLADE

Carbon steel premium blade cut smooth.

S-920 (Size: 11 3/4")each 199.95 \$CAD

FLESH-ALL MINI SHAVER

Here is an alternative to expensive fleshing machines. This amazing hand tool, invented by taxidermist Dale Guinn of Oklahoma, attaches to your air compressor to shave mammal skins similar to the large table models costing 4 to 5 times as much. The depth of the cut is controlled by an adjustable blade guard. Optimum operating air pressure is 50 psi of continuous air at 4.0 CFM (this will require at least a 2 1/2 HP compressor). Works great for shaving intricate facial details as well as larger areas of the hide. Extremely easy to use!

Epoxies, Adhesives and Fillers

MAGIC SCULPT

Tired of paying an arm and a leg for a two-year supply of sculpting epoxy compound? MAGIC-SCULPT is the answer! It is available in a convenient and inexpensive 8 oz. kit, as well as a traditional 5 lb. kit and even a 20 lb. kit for big shops!

To use MAGIC-SCULPT, you simply mix equal parts of the resin and hardener, then knead together until a uniform color is obtained. It can then be shaped, sculpted and smoothed with a wet finger or modeling tools. It will harden in 1 1/2 to 3 hours.

MAGIC-SCULPT is perfect for fish taxidermy work. It's great for rebuilding sunken areas, setting eyes, sculpting scales, hiding seams and repairing damaged areas. MAGIC-SCULPT will adhere tenaciously to most any surface, and can be sanded and painted when hard. Use in mammal taxidermy for sculpting around jaw sets, noses, eyes, lips, foot pads, etc. Bird taxidermists will find it useful for repairing shot holes in bills and legs, as well as rebuilding eyelids. Order one today and try it out! Colour - Natural.

Easily Mixed (Resin and Hardener slightly color coded: mix until one solid color).

Good adhesion to almost all clean surfaces, including glass.

Excellent malleability.

Good sculpting media: as easy to work with as oil clay.

Surface may be smoothed out with water.

Water and soap clean up.

Completely inert when cured.

Accepts all types of paint.

Surface may be sanded or ground when cured.

No measurable shrinkage.

MS1 MAGIC-SCULPT 16 oz. kit (8 oz. resin plus 8 oz. hardener)	25.95 \$CAD
MS2 MAGIC-SCULPT 5 lb. kit (2 1/2 lb. resin plus 2 1/2 lb. hardener)	58.50 \$CAD
MS3 MAGIC-SCULPT 20 lb. kit (10 lb. resin plus 10 lb. hardener)	220.95 \$CAD

MAGIC-SMOOTH

Magic Smooth is a two part epoxy similar to magic sculp but having a much softer consistency. The benefits of this product over Magic Sculp is that it can be smoothed to a feather edge making it excellent for finishing detail whether it be fish head detail or mammal eye work. Also an excellent product for fin backing especially where extreme repairs with some sort of backing material are required. Magic Smooth is water based and clean up and smoothing out can be accomplished with simply using water.

MSM-1 16 oz. kit (8 oz. resin + 8 oz. hardener)	31.25 \$CAD
MSM-2 4 lb. kit (2 lb. resin + 2 lb. hardener)	79.95 \$CAD

ANTLER BASE GLUE

An extremely powerful two-part epoxy adhesive for the taxidermy industry. Designed for gluing skins tightly around antler burrs, earliners to earskin and open-mouth work. This adhesive allows ample work time (1 1/2 hours) before permanently hardening. To use, the artist simply mixes equal amounts of Part A and Part B with a tongue depressor on a paper plate or piece of cardboard. This is not an air dry adhesive - once it sets up, the bond is permanent.

ABG (16 oz. Kit- 8 oz. resin/ 8 oz. hardener)	31.25 \$CAD
---	--------------------

Epoxies, Adhesives and Fillers

APOXIE SCULPT

Apoxie Sculpt is a fine quality epoxy compound. This material has proven itself superior. It is a two part epoxy modeling compound that mixes in equal parts to a soft workable putty that smooths with water. It dries hard, will not shrink or crack and accepts all paints. We feel you will really like the consistency of this product. It won't harden in its container (until the 2 parts are mixed), is user friendly with no harsh chemicals, is virtually odorless, and has an unlimited shelf life if stored frozen. Excellent for finishing open mouths, eyes and nostrils or for repairs such as reconstructing broken antlers. Available in natural colour only.

AS-1/4 NATURAL (1/4 lb. kit) 12.50 \$CAD

Molding

URETHANE FOAM

This is a 4 lb. density two-component urethane foam. Simply mix equal amounts of part A and part B (1 to 1 ratio by weight). (Caution: Do not breath fumes while foam is expanding.)

UF5 (1 litre A and B)each 38.95 CAD
UF20 (1 gallon A and B)each 125.00 CAD

LIQUA-CAST

A super-fast setting two parts casting material which will set up in one to five minutes, depending on the room temperature. Cures rock-hard and is inexpensive enough to use on just about anything. Captures incredible details in flexible molds (not for use in Alginate molds or any other moist material). Use it to cast duck heads, duck feet, teeth, claws, earliners, rocks, leaves, noses or anything you can think of!

LC10-16 (natural color - 8 oz. part A and B) ..21.50 \$CAD

INJECTA-CAST

Injection-grade liquid casting material which sets up hard three to five minutes after mixing. Used to plump up bird feet, small mammal toes, or any injectable area which is susceptible to shrinkage. Simply mix equal parts of part A and part B and quickly inject the material through a hypodermic needle into the toes and foot of the specimen. The syringe and needle should be immediately cleaned with acetone to prevent Injecta-Cast from setting up in the hypodermic needle. Within five minutes the material will harden preventing any further shrinkage

LC30-16 (8 oz. part A and B) each 21.50 \$CAD

BM POLYMER COATING (Formerly known as Envirotex)

This is the original high gloss polymer coating which produces a glass-like premium high gloss plastic finish. Designed for interior use. BM Polymer is an epoxy-based reactive polymer compound, that will only cure after its two components have been thoroughly mixed together. It may be poured or brushed with one coat equal to 50 coats of ordinary varnish or lacquers. The finish will self-level. BM Polymer is perfect for creating crystal-clear shallow pools with smooth surfaces. It is also great for making cypress clocks, table tops, or as a glossy protective coating for skulls.

Tanning instructions

REHYDRATING PROCESS (formula 1)

This process will rehydrate dried skins, such as African skins or grease burned skins.

Mix:

10 Gal. of water at 35 degree Celsius
½ lb. of **Nitro Plus**
35 ml. of **Safuron** or **BM 4 in 1**
2 oz. (weight) of **Degracide**
4 oz. (weight) of **Enzimol**

(Soak for 4 to 72 hours)

Remove the skins. Rinse in cold water (20 minutes).
Start pickling according to usual process.

REHYDRATING PROCESS (formula 2)

This process will rehydrate dry salted skins.

Mix:

10 Gal. of water
70 ml of **BM Antibac**
70 ml. of **Safuron** or **BM 4 in 1**

(Soak overnight)

Remove the skins. Rinse in cold water (20 minutes).
Start pickling according to usual process.

TANNING WITH LUTAN-FN

This process will create a nice white-colored skin with excellent stretch. Minimum shrinkage.

Pickle solution

Water 10 Gal.
Tanner's salt (non-iodized) 6 ½ lb.
(or 10 lb of **Fine Salt**)
Acid bath 7 ½ oz. (weight)
Transpacide 70 ml

Maintain the PH of the pickle solution between 1 and 2 at all times.

Soak for 12 to 24 hours.

Remove the skins from pickle solution.

Drain and shave the skins.

We recommend returning the skins to the pickle for another 12 hours.
Remove the skins from the pickle solution and rinse the skins in 10 gallons of cold water for 30 minutes before the tanning process.

Tanning process

Water 10 Gal.
Fine Salt 7 lb.
Lutan-FN 1 lb.

Maintain the PH of your tanning solution between 3.5 and 4 at all times.

Soak for 12 to 24 hours.

Neutralizing solution

Water 10 gal.
Sal Soda 5 oz (weight).

Let the skins soak for 30 minutes.

Remove the skins from neutralizing solution, drain.

Tanning oil

Oil the skin with **BM Tanning Oil or Mixture Derme CV-N3**.
Allow the oil to penetrate for 3 to 4 hours.
Tumble or drum the skins in **Tanner's sawdust** for 45 min.
Put the skin in a plastic bag.
Place it in the freezer till you're ready to mount it.

Tanning instructions

TANNING WITH SOLUTAN 2000 (formula #1)

This formula is made for dry tanning optimal results.

Pickling solution

Water 10 Gal.
Tanner's salt (non-iodized) 3 ¾ lb.
(or 5 ¾ lb of **Fine Salt**)
Sulfuric acid 70 ml
Transpacide 70 ml

Maintain the PH of the pickle solution between 1 and 2 at all times.

Soak for 2 to 3 nights.
Remove the skins from pickle solution.
Drain and shave the skins.
We recommend returning the skins to the pickle for another 12 hours.
Remove the skins from the pickle solution.

Tanning process

Water 10 Gal.
Fine Salt 9 ¼ lb.
Degracide ¼ lb.
Solutan 2000 ¼ lb.
Formic acid 70 ml

Maintain the PH of your tanning solution at 2.5 at all times.
Let the skins soak for 3 to 4 nights.

Then add the following:
Solutan 2000 ¼ lb.
Neutrasium ¼ lb.

Maintain the PH of your tanning solution at 3.5.
Let the skins soak for 4 hours

Then add the following:
Activateur 2000 ¼ lb.
Mixture Derme S 135 ml.
Baking soda 1 oz.

Maintain the PH of your tanning solution at 4.5 at all times.
Let the skins soak for 1 night.

Remove the skins from tanning solution.
Let the skins drain for 2-3 hours.
Prepare a Re-tanning solution.

Re-tanning solution

Water 10 gal.
Fine salt 7 lb.
Silitan 70 ml
Mixture Derme CV-N3 or **BM Tanning oil** 100 ml

Let the skins soak 1 night.
Remove the skins from the solution.
Drain the skins for 2-3 hours.
Finalize according to usual process (oiling, drying, and tumbling)

TANNING IN 1 DRUM (wet tan)

This formula is specially made for taxidermists working in small shops

Pickling and tanning solution

Water 10 Gal.
Tanner's salt (non-iodized) 3 ¾ lb.
(or 5 ¾ lb of **Fine Salt**)
Sulfuric acid 70 ml
Transpacide 100 ml

Maintain the PH of the pickle solution between 1 and 2 at all times.

Let the skins soak for 2 to 3 nights.
Remove the skins from pickle solution.
Drain and shave the skins.

Then add the following:
Fine salt 3 ¾ lb.
Solutan 2000 ½ lb.
Mixture Derme S 135 ml

Maintain the PH of the solution between 1 and 2 at all times.
Let the skins soak 1 night.

Then add the following:
Neutrasium ¼ lb.

Maintain the PH of the solution at 2.5.
Let the skins soak for 4 hours

Then add the following:
Activateur 2000 ¼ lb. or **Silitan** 70 ml
Baking soda till you reach a PH level of 4.5.

Let the skins soak 1 night.
Drain the skins for 2-3 hours.
Wash the skins for 10 minutes in warm water.
Drain the skins 1 hour.
Put the skins in a plastic bag.
Place it in the freezer till you're ready to mount it.

Tanning instructions

TANNING IN 2 DRUMS (wet tan)

This formula will give the taxidermist the opportunity to use each solution more than 1 time.

Pickling solution

Water 10 Gal.
Tanner's salt (non-iodized) 3 ¾ lb.
(or 5 ¾ lb of **Fine Salt**)
Sulfuric acid 100 ml
Transpacide 70 ml

Maintain the PH of the pickle solution between 1 and 2 at all times.

Let the skins soak for 2 to 3 nights.
Remove the skins from pickle solution.
Drain and shave the skins.

Tanning solution

Water 10 Gal.
Fine salt 9 ¼ lb
Solutan 2000 ½ lb.
Mixture Derme S 135 ml.
Neutrasium ¼ lb.

Maintain the PH of tanning solution at 4.5 at all times.

Let soak the skins for 1 night.
Remove the skins from tanning solution.
Wash the skins in 10 gallons of warm water.
Drain the skins
Put the skins in a plastic bag.
Place it in the freezer till you're ready to mount it.

BUCKSKIN TANNING

This kind of work should be done outside your shop.

Rehydrating process

(see page 19)

Lime (operation of removing the hair to get a leather)

Water 10 gal.
Lime ½ lb.
Lime activator ½ lb.
(PH: 12)

Let the skins soak 24-72 hours.
Push the hair off.
Wash the skins in warm water for 20 minutes.
Drain and start the deliming process.

Deliming

Water 10 gal.
Nitro Plus ½ lb.

Let the leathers soak for 30 minutes.

Then add the following:

Degracide ½ lb.
(PH: 7 or 8)

Let the leathers soak 1 night.

Remove the leathers from the deliming solution.
Wash in warm water for 20 minutes.
Drain and start the pickle process.
Continue on with the rest of tanning process.

ANTLER IN VELVET TANNING

Tanning solution specially designed to set and tan velvet on antlers

Puncture the velvet with needles every 1/4 inch in order to ensure maximum penetration of the solution during soaking

Tanning solution

Water 10 Gal.
Tanner's salt (non-iodized) 15 lb
Dispersateur 2000 135 ml

Let soak the antler in velvet in the solution for 5 days
Remove and rinse
Let it dry completely.

Tanning and Chemical Supplies

BM's TANNING PRODUCTS

BM TANNING OIL

BM TANNING OIL is a special blend of oils and formulated for a better penetration of the skin. If used in conjunction with Monotan, Lutan-FN or a Solutan 2000 solution, you will obtain more supple and softer skins. For best results, mix 50/50 BM TANNING OIL with hot water and apply directly on the flesh side of the skin.

BM-TAN OIL-32 (32 oz. bottle).....each 18.00 CAD
BM-TAN OIL-128 (1 gallon bottle)each 57.00 CAD
BM-TAN OIL-5 (5 gallons bottle)each 240.00 CAD

BM TAN 102

BM TAN 102 is a special blend of oils and formulated for a better penetration of the skin. If you feel your skins need more softness, use BM Tan 102. If used in conjunction with Monotan, Lutan-FN or a Solutan 2000 solution, you will obtain more supple and softer skins.

BM-TAN 102-32 (32 oz. bottle).....each 21.00 CAD
BM-TAN 102-128 (1 gallon bottle)each 65.00 CAD

LIPODERM LIQUOR PSE

Lipoderm Liquor PSE is suitable for fatliquoring all types of fur skin. Lipoderm Liquor PSE can be applied to the pickle, to the tan bath or after tanning. In order to obtain a more rapid dispersion, it is advisable to add the fat liquor in form of an emulsion. Leather becomes exceptionally soft when the fatliquor is added to the tan bath. Lipoderm Liquor PSE penetrates rapidly and uniformly into the leather of fur skins and promotes the uptake of other fats. A soft, stretchy and non-yellowing fur leather is obtained with this product. In pickling, or the tanning of fur skins or in a separate bath after tanning: Use 4-10g/Litre Lipoderm Liquor PSE

LIP/PSE-1 (1 Litre).....each 18.00 CAD
LIP/PSE-4 (4 Litre).....each 57.00 CAD

BM 4 in 1

BM 4 in 1 can be used in all soak solutions for cleaning, relaxing degreasing and preparing skins for tanning. It will not cause hair slippage because of its low PH. Stronger than dish detergents.

BM-4-1-32 (32 oz. bottle).....each 14.95 CAD
BM-4-1-128 (1 gallon bottle)each 46.95 CAD
BM-4-1-5 (5 gallon pail)each 197.95 CAD

BM 4 in 1(Scented)

Same efficiency as our regular BM 4 in 1 with a pine freshness added to our formula to remove and mask unpleasant odors.

PINE-4-1-32 (32 oz. bottle).....each 14.95 CAD
PINE-4-1-128 (1 gallon bottle)each 46.95 CAD
PINE-4-1-5 (5 gallon pail)each 197.95 CAD

BM ANTIBAC

BM ANTIBAC is a highly concentrated bactericide. We recommended to use 70 ml for each 10 gallons of water. Include BM ANTIBAC during rehydration of salted skins, detergent wash solutions and brine solutions. Bacteria problems are the main reasons for hair slippage.

BM-ANTIBAC-32 (32 oz. bottle).....each 4.00 CAD
BM-ANTIBAC-128 (1 gallon bottle)each 7.00 CAD
BM-ANTIBAC-5 (5 gallon pail)each 27.00 CAD
BM-ANTIBAC-30 (30 gallon drum)each 135.00 CAD

Tanning and Chemical Supplies

TANNING PRODUCTS FOR BEGINNERS

MONOTAN

MONOTAN is the best tanning solution for a beginner. **MONOTAN** is a powder tanning solution containing a special blend of acids and tanning agents that will produce a soft and supple skin.

Mix all the **MONOTAN** in 10 gallons of warm water (can tan 2 deer capes). Let the skin soak for 72 to 96 hours, then neutralize the tanning solution with sal soda. Wash the skin 10-15 minutes. Remove and drain. Easy as 1-2-3. (Tanning oil sold separately)

MONO (enough for 10 gal)each 19.00 CAD

BM TAN 101

Like **MONOTAN**, **BM TAN 101** is a powder tanning solution containing a special blend of acids and tanning agents that will produce a soft and supple skin. **BM TAN 101** will give your hides more stretch than **MONOTAN**

Mix all the **TAN 101** in 10 gallons of warm water (can tan 2 deer capes). Let the skin soak for 72 to 96 hours, then neutralize the tanning solution with sal soda. Wash the skin 10-15 minutes. Remove and drain. Easy as 1-2-3. (Tanning oil sold separately)

BM-TAN 101 (enough for 10 gal)each 24.00 CAD

BM TANNING KIT

The **BM TANNING KIT** includes tanning products, neutralizer, softening oil and all the instructions needed for a beginner. One kit can tan one complete deer hide or 3 beaver.

BM TAN KIT (enough for 10 gal)each 29.95 CAD

BM SKULL BLEACHING KIT

The **BM SKULL KIT** includes Sal Soda, White Bone, Magnesium Carbonate, Skull Finish and all the instructions needed for a beginner. One kit can bleach one moose skull or two deer skull or 2 bear skull.

BM SKULL KITeach 19.95 CAD

Tanning and Chemical Supplies

REHYDRATING PRODUCTS

(See rehydrating procedures on page 19)

BM REHYDRATE 101

Special blend of relaxing agents which can be used to relax dry skins. Mix all the ingredients in 10 gallons of hot water. Let the skins soak for 4 to 72 hours. Rinse (20 minutes) in cold water. Continue the usual process of tanning.

- BM-HYD-101 (enough for 10 gal)each 9.00 CAD**
- BM-HYD-30 (enough for 30 gal)each 20.00 CAD**

ENZIMOL

To softened the leather evenly by restoring its original look. Use in rehydrating solution.

- ENZ-1 (1 kg)each 21.00 \$CAD**
- ENZ-10 (10 kg)each 180.00 \$CAD**
- ENZ-25 (25 kg)each 400.00 \$CAD**

DEGRACIDE

Degraded protein substances (hard to tan) in the leather. It helps to completely exhaust the mineral tanning agents. Acid light for delimiting basic agents after a stage of ``hair off``. This product may also be used to rehydrate the dry raw hides and skins.

- DEG-1 (1 kg.).....each 16.00 \$CAD**
- DEG-5 (5 kg.).....each 68.00 \$CAD**
- DEG-10 (10 kg.).....each 125.00 \$CAD**
- DEG-25 (25 kg.).....each 280.00 \$CAD**

NITRO PLUS

Penetrates leather unprocessed dried to give flexibility and regenerate the fibers of the leather. Very good product for delimiting basic agents after a stage of ``hair off`` (antibacterial).

- NITRO-1 (1 kg)each 4.75 CAD**
- NITRO-10 (10 kg)each 26.00 CAD**
- NITRO -25 (25 kg)each 55.00 CAD**

SAFURON

Pronounced wetting of the leather. Degreases and cleans the surface. Makes the rehydration of the leather easier.

- SAF-32 (32 oz.).....each 6.00 CAD**
- SAF -128 (1 gal).....each 15.00 CAD**
- SAF -5 (5 gal).....each 56.00 CAD**
- SAF -30 (30 gal).....each 310.00 CAD**

DEGREASER

(Dangerous good):additional charges will be added for the transport of hazardous materials

SOLUDÉGRAISSE

*** (Dangerous Good)

Solvent cleaner and degreaser. Can be used for fur to dry cleaning with sawdust or for the degreasing of bird skins. This product can be reused several times.

For birds: soak the bird skin completely in Soludégraisse:
15 min./grouse, 30 min./duck, 45 min./goose

- SODG-32 (32 oz.)each 15.00 CAD**
- SODG -128 (1 gal).....each 35.00 CAD**
- SODG -5 (5 gal).....each 150.00 CAD**

SOLUPRÉSERVE

*** (Dangerous Good)

A unique product of its kind to prepare fish skins for tanning. Holds the scales that tend to detach from the skin, provides a good elasticity and a smooth surface when it dries. Dilute **Solupréserve** 50/50 with warm water and submerge the skin at least 24 hours, or more, if the fish skin is oily. Rinse in cold water with **Safuron**. Then submerge in water with **Borax**: a cup per gallon of water for 20 minutes. Now your fish is ready for mounting.

- SOPR-32 (32 oz.).....each 12.95 CAD**
- SOPR -128 (1 gal)each 29.95 CAD**
- SOPR -5 (5 gal)each 125.00 CAD**

BM POLY-TAN

*** (Dangerous Good)

Can tan fish and bird easily. Mix BM POLY-TAN with an equal amount of water, follow the directions on the bottle and use your solution over and over.

- BM-POLY-32 (32 oz.).....each 12.95 CAD**
- BM-POLY-128 (1 gal)each 29.95 CAD**
- BM-POLY-5 (5 gal)each 125.00 CAD**

Tanning and Chemical Supplies

ACIDS AND PICKLING PRODUCTS

(See pickling procedures on page: 19-20-21)

ACID BATH (Oxalic acid)

An absolute **MUST** for good tanning. Increases degree of tan by 50%. When dissolved, rapidly penetrates for proper pickling action. Acid level monitored with Ph paper. Neutralize with Baking Soda.

CT-15-16 (1 lb)	each 5.95 CAD
CT-15-4 (4 lb.)	each 9.95 CAD
CT-15-10 (10 lb)	each 22.50 CAD
CT-15-20 (20 lb)	each 39.95 CAD
CT-15-55 (55 lb.)	each 94.50 CAD

CITRIC ACID

An excellent natural pickling agent. We recommend using Citric Acid when you want to avoid environmental and personal handling problems. It will do as excellent a pickling job as any of the other acids being used. Mix enough pickling solution to completely submerge the skins or capes. Mix the solution 24 hours before you will use it, using hot water. For every 1 gallon of solution needed, mix:

- 1 gallon of hot water
- 3 oz. of Citric Acid = 3 level tablespoonfuls
- 1 lb. of non-iodized salt – 2 ½ cupfuls

After mixing and cooling the solution for 24 hours, test the Ph level. It should read below a 2.5 Ph. If you are using a salinometer, it should read 40% or higher. Place the skins or capes into the solution, and allow them to pickled. The skins or capes will appear translucent and milky colored.

CA-1 (1 lb)	each 5.75 CAD
CA-3 (3 lb.)	each 9.00 CAD
CA-10 (10 lb)	each 25.00 CAD
CA-20 (20 lb)	each 37.95 CAD
CA-55 (55 lb.)	each 89.95 CAD

FORMIC ACID

*** (Dangerous Good)

Use it to adjust the PH level

FORMIC-32 (32 oz.)	each 10.00 CAD
FORMIC-128 (1 gal)	each 25.00 CAD
FORMIC-5 (5 gal)	each 120.00 CAD
FORMIC-45 (45 gal)	each 800.00 CAD

SULFURIC ACID

*** (Dangerous Good)

Acts on the swelling of the leather

SULF-32 (32 oz.)	each 8.00 CAD
SULF-128 (1 gal)	each 20.00 CAD
SULF-5 (5 gal)	each 75.00 CAD
SULF-45 (45 gal)	each 450.00 CAD

TRANSPACIDE

Acid to facilitate the fleshing of the skin. It allows the salt to dissolve. It goes through the fat and makes a softer leather.

TRA-32 (32 oz.)	each 20.00 CAD
TRA-128 (1 gal)	each 60.00 CAD
TRA-5 (5 gal)	each 280.00 CAD
TRA-45 (45 gal)	each 2050.00 CAD

DEGRACIDE

Degraded protein substances (hard to tan) in the leather. It helps to completely exhaust the mineral tanning agents. Acid light for delimiting basic agents after a stage of ``hair off``.

DEG-1 (1 kg.)	each 16.00 \$CAD
DEG-5 (5 kg.)	each 68.00 \$CAD
DEG-10 (10 kg.)	each 125.00 \$CAD
DEG-25 (25 kg.)	each 280.00 \$CAD

TANNER'S SALT (Non-iodized)

The salting process is vitally important for both preventing the hair slippage and preparing the skin for the tanning process. You should thoroughly cover the skin with salt, rubbing it all over and into the entire cape to ensure the penetration. This process will draw the moisture from the cape so lay it on an incline of some type in order to allow the cape drain. An occasional resalting will be required until the cape has sufficiently dried.

*Note: we recommend Tanner's salt (non-iodized) for maximum coverage and penetration.

SALT-2 (2 kg. bag)	each 7.50 CAD
SALT-5 (5 kg. bag)	each 15.00 CAD
SALT-25 (25 kg.)	each 48.00 CAD

BASCAL S

Bascal S is used in the soaking bath to counteract hairslip and in pickling to achieve light and soft skins. Also makes shaving easier. Can also be used as a delimiting agent in the hair removal process. When used in a pickle solution with other acids, use 1 oz. of Bascal S, ½ the usual amount of other acid to 1 gallon of water. When used alone without an acid, use 2 oz. of Bascal S. Once you use this product you'll never tan another skin without it.

BAS/S-1 (1 kg.)	each 16.00 \$CAD
BAS/S-5 (5 kg.)	each 68.00 \$CAD
BAS/S-10 (10 kg.)	each 125.00 \$CAD
BAS/S-25 (25 kg.)	each 280.00 \$CAD

Tanning and Chemical Supplies

MINERAL TANNING PRODUCTS

(See tanning procedures on page: 19-20-21)

SOLUTAN 2000

Mineral tanning agent used to consistently pronounce the action in the fibres of the leather. Makes the leather more supple. Gives a compact structure and a tight grain. To get a leather best quality and superior durability compared to other mineral tanning products.

- TAN 2000-1 (1 kg).....each 15.00 \$CAD
- TAN 2000-10 (10 kg.).....each 131.50 \$CAD
- TAN 2000-25 (25 kg).....each 290.00 \$CAD
- TAN 2000-150 (147 kg.).....each 1500.00 \$CAD

LUTAN-FN TANNING AGENT

Lutan-FN has been used in many commercial tanneries for years. It's easy to use – after salting, pickling and shaving, a simple one step soaking process does the job. Lutan-FN creates a nice white-colored tanned skin. Consistent results every time. 1 oz. of Lutan-FN tans 1 lb. of raw skin.

- LFN-2 (2 lb.)each 15.50 CAD
- LFN-5 (5 lb.)each 32.00 CAD
- LFN-10 (10 lb.)each 59.00 CAD
- LFN-25 (25 lb.)each 136.00 CAD
- LFN-55 (55 lb.)each 273.00 CAD

ALUMINUM SULPHATE

Aluminum Sulphate is recommended only to be used as a light pickling for skins or as a partial tanning agent. This product is not recommended for full tanning because the combination of sulphate and water that leaves sulfuric acid residue in the skin and because of the lack of stretch. A small amount, however, can be used in the salt brine to help set the hair and make the skin easier to shave.

- AS2 (2 kg. bag)each 8.00 CAD
- AS5 (5 kg. bag)each 15.00 CAD
- AS10 (10 kg. bag)each 22.50 CAD
- AS20 (20 kg. bag)each 29.00 CAD
- AS200 (200 kg.)each 250.00 CAD

SYNTHETIC TANNING PRODUCTS

(See tanning procedures on page: 19-20-21)

SILITAN

Silitan is a very versatile tanning product, it can be incorporated to the tanning or after the tanning. Silitan is resistant to acids, alkalis and salts. It is compatible with other agents for retanning and tanning oil. Due to its exceptional penetration level, Silitan performs really well when it is applied directly to the leather.

- SILITAN-32 (32 oz)each 17.00 CAD
- SILITAN-128 (1 gal).....each 55.00 CAD
- SILITAN-5 (5 gal).....each 235.00 CAD

BLANKOTAN

Blankotan is a blend of specially developed oils and tanning agents for the purpose of tanning fur skins and hair-on skins especially for taxidermy. First, use an acid pickle and then brush-on with Blankotan. A 32 oz bottle can tan 4 average size capes.

- BLA-32 (32 oz)each 18.00 CAD
- BLA-128 (1 gal).....each 60.00 CAD
- BLA-5 (5 gal).....each 255.00 CAD
- BLA-30 (30 gal.).....each 1265.00 CAD

ACTIVATEUR 2000

Versatile synthetic tanning product. For a full and soft leather. Increases the smoothness of the leather.

- ACT-1 (1 kg)each 16.00 CAD
- ACT-10 (10 kg.).....each 130.00 CAD
- ACT-25 (25 kg)each 290.00 CAD

DISPERSATEUR 2000

Tanning agent used in our “ antler in velvet” tanning solution (see info on p.21)

- DIS-4 (4 oz).....each 6.00 CAD
- DIS-8 (8 oz).....each 8.00 CAD
- DIS-16 (16 oz).....each 14.95 CAD
- DIS-32 (32 oz).....each 24.95 CAD
- DIS-128 (1 gal)each 89.95 CAD

Tanning and Chemical Supplies

NEUTRALIZER

(See neutralizing procedures on page 19)

NEUTRASIMUM

Use to neutralize acids in tanning solutions. It fixed mineral tanning agents in the leather and reduces the chances of oxidation.

- NEUTRA-1 (1 kg)each 7.50 CAD
- NEUTRA -10 (10 kg.)each 56.50 CAD
- NEUTRA -25 (25 kg)each 122.00 CAD
- NEUTRA -250 (250 kg.)each 915.00 CAD

SODIUM BICARBONATE (Baking Soda)

A very penetrating neutralizing agent used to basify (adjust) Aluminum Sulfate or Lutan-FN.

- BS-1 (1 lb)each 1.50 CAD
- BS-5 (5 lb.)each 5.00 CAD
- BS-10 (10 lb)each 8.00 CAD
- BS-20 (20 lb)each 15.00 CAD
- BS-55 (55 lb)each 37.00 CAD

SAL SODA

This useful product is helpful in dissolving meat, fat and grease when boiling skulls and antler plates. If meat, membrane and grease are not removed, the decaying tissue will attract insects to the mount in the future. To use, simply add a small amount of Sal Soda (1 cup per gallon of water) to salt water in a non-aluminum pan, bring to a boil and immerse the skull or antler plate in the solution. Check the progress occasionally and remove when the flesh turns into a jelly-like substance (within about a half-hour – no longer). The tissue can then be easily removed by scraping off. Repeat if necessary for an additional 15 minutes. After rinsing, the cleaned antler plate is ready for mounting. To bleach out a skull after boiling and removing the meat, soak the skull in Hydrogen Peroxide overnight, rinse and allow the skull to bleach out white in the sun.

- SS-1 (1 lb).....each 2.00 CAD
- SS-5 (5 lb.).....each 6.00 CAD
- SS-10 (10 lb).....each 11.00 CAD
- SS-20 (20 lb).....each 20.00 CAD
- SS-55 (55 lb).....each 48.00 CAD

TANNING OIL

(See tanning oil procedures on page 19)

MIXTURE DERME V

Mixture of natural and synthetic tanning oils. Can be applied directly to the leather or be embedded in tanning solutions. Makes the leather soft and elastic.

- MIX-V-32 (32 oz)each 13.00 CAD
- MIX-V-128 (1 gal).....each 40.00 CAD
- MIX-V-5 (5 gal).....each 150.00 CAD
- MIX-V-45 (45 gal.).....each 1200.00 CAD

MIXTURE DERME N

Semi-natural oil. This tanning oil penetrates deeply into the leather leaving a good load of oil.

- MIX-N-128 (1 gal).....each 42.00 CAD
- MIX-N-5 (5 gal).....each 180.00 CAD
- MIX-N-45 (45 gal.).....each 1500.00 CAD

MIXTURE DERME S

Mixture Derme S is specifically designed to treat fur and wool skins. It makes a white color leather and not yellowed it. Mixture Derme S's property to penetrate deeply into the leather making it more flexible, elastic and silky. Due to its high concentration in emulsifier agent it cleans the fur and emulsify the natural fats in the skin.

- MIX-S-32 (32 oz).....each 15.00 CAD
- MIX-S-128 (1 gal)each 43.50 CAD
- MIX-S-5 (5 gal)each 185.00 CAD
- MIX-S-30 (30 gal.)each 915.00 CAD

Tanning and Chemical Supplies

TANNING OIL

(See tanning oil procedures on page 19)

MIXTURE DERME C

Semi-synthetic oil. Grease the surface of the leather and makes it more flexible and elastic.

- MIX-C-32 (32 oz)each 16.00 CAD
- MIX-C-128 (1 gal)each 45.00 CAD
- MIX-C-5 (5 gal)each 189.00 CAD
- MIX-C-30 (30 gal.)each 970.00 CAD

MIXTURE DERME CN

Mixture of natural and synthetic oils for tanning. Oils very well balanced for better penetration in the leather. To get a very flexible and elastic leather to fur skins. Similar to the Mixture Derme N mixture but with superior quality.

- MIX-CN-32 (32 oz)each 15.00 CAD
- MIX-CN-128 (1 gal)each 43.00 CAD
- MIX-CN-5 (5 gal)each 185.00 CAD
- MIX-CN-30 (30 gal.)each 915.00 CAD

TANNING OIL

(See tanning oil procedures on page 19)

BEST SELLER

MIXTURE DERME CV-N3

Mixture Derme CV-N3 is a combination of high-quality tanning oils. It provides skin flexibility, a better elasticity and a silky finish leaving pale staining to leather. Mixture Derme CV-N3 is resistant to acids, salts and mineral tanning agents.

- CVN3-32 (32 oz)each 14.00 CAD
- CVN3-128 (1 gal)each 42.00 CAD
- CVN3-5 (5 gal)each 180.00 CAD
- CVN3-30 (30 gal.)each 895.00 CAD

MIXTURE POLYDERME

Mixture Polyderme is a combination of tanning oils containing a low dose of tanning solution. Supplementing the traditional tanning, it has been specifically designed to simplify and improve the quality of the pelts to fur and leather production-related. Mixture Polyderme is dark brown. It reinforced the fibers of the leather by increasing their resistance to water and heat. In addition, it provides better flexibility, elasticity and a silky finish.

- MIX-POLY-32 (32 oz)each 15.00 CAD
- MIX-POLY-128 (1 gal)each 43.00 CAD
- MIX-POLY-5 (5 gal)each 185.00 CAD
- MIX-POLY-30 (30 gal.)each 915.00 CAD

Tanning and Chemical Supplies

HAIR OFF CHEMICAL PRODUCTS

(See hair off procedures on page 21)

LIME

Basic and chemical agent causing the hair loss.

- LIME-1 (1 kg.).....each 3.00 CAD
- LIME-10 (10 kg.).....each 12.00 CAD
- LIME-25 (25 kg.).....each 25.00 CAD

LIME ACTIVATOR

Basic agent. Will help the lost of hair during the hair off process.

- AC-LIME-1 (1 kg.)each 9.50 CAD
- AC-LIME-10 (10 kg.).....each 73.00 CAD
- AC-LIME-25 (25 kg.).....each 160.00 CAD

DEGRACIDE

Degraded protein substances (hard to tan) in the leather. It helps to completely exhaust the mineral tanning agents. Acid light for deliming basic agents after a stage of ``hair off``

- DEG-1 (1 kg.).....each 16.00 \$CAD
- DEG-5 (5 kg.).....each 68.00 \$CAD
- DEG-10 (10 kg.).....each 125.00 \$CAD
- DEG-25 (25 kg.).....each 280.00 \$CAD

NITRO PLUS

Penetrates leather unprocessed dried to give flexibility and regenerate the leather fiber. Very good product for deliming basic agents after a stage of hair off.

- NPLUS-1 (1 kg.)each 4.75 CAD
- NPLUS-10 (10 kg.).....each 26.00 CAD
- NPLUS-25 (25 kg.).....each 55.00 CAD

HAIR OFF CHEMICAL PRODUCTS

HAIR OFF SYSTEM (BM Sports)

BM Sports Hair Off System is a 2 part kit which is used to strip hair from skin prior to tanning. A 10 gallon kit will dehair 1 deer back skin.

- CSP-10-1 (enough for 10 gal.)..... 9.95 CAD
- CSP-30 (enough for 30 gal.)..... 26.95 CAD

BLEACHING AGENT

SOLUBLANC

Bleach for fur and wool. Use mainly for wool skins. Gives a more white and radiant appearance. Can also be used on fur skins that require to be clarified. Eliminates the present yellow surfaces in the fur without removing the natural pigmentation of hair

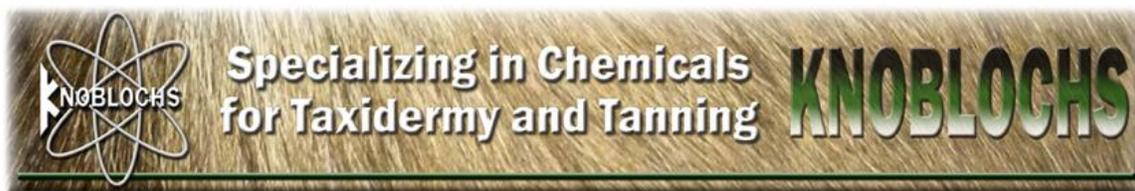

Solublanc will react with acids contact.
Directions: Add ½ lb. of Solublanc to 10 gallons of your pickling solution (at the end of your pickling process). Let soak overnight or a minimum of 8 hours. Then continue the usual process of tanning.

- SOLUBLANC-1 (1 kg.)each 18.00 CAD
- SOLUBLANC -10 (10 kg.)each 152.00 CAD
- SOLUBLANC -25 (25 kg.)each 320.00 CAD

Offering the best tanning products in Canada

Tanning and Chemical Supplies

BM SPORTS DISTRIBUTION is also distributing KNOBLOCHS

LIQUA TAN (Knobluchs)

Liqua Tan is a complet and permanent tan. Fast drying. Compatible with all hide paste, Excellent stretch. Sets hair. No oily mess. Reduces shrinkage to almost zero. Easy to use. Can be mounted the same day or dried and handled as a tanned skin.

K1-32 (32 oz. bottle).....each 22.95 \$CAD
K1-128 (1 gallon bottle)each 74.95 \$CAD

LIQUA SOFT (Knobluchs)

A special tanning oil designed to be used with Liqua Tan when skins are to be used as flat skins or rugs. Helps produce a soft supple skin. Has special softening agents.

K6-32 (32 oz. bottle).....each 19.95 \$CAD
K6-128 (1 gallon bottle)each 65.95 \$CAD

LIQUA CURE (Knobluchs)

Liqua Cure is for fish and birds. It preserves (tans), degreases, cleans and removes odors. Liqua Cure also reduces shrinkage. This is a concentrate that is mixed one part Liqua Cure to ten parts water.

K2-32 (32 oz. bottle).....each 32.95 \$CAD

PRE TAN #110 (Knobluchs)

PRE TAN #110 is used in the salt brine solution to help set hair, retard bacteria growth, and pre-tan the skin. This product helps make shaving easier and produces better and softer leather. It does not require neutralizing and will not reduce stretch.

K110-32 (32 oz. bottle).....each 26.95 \$CAD

REPTILE TAN (Knobluchs)

Reptile Tan is used for tanning snakes and other reptiles, leaving them soft and pliable. Easy to use.

K3-16 (16 oz. bottle).....each 14.95 \$CAD
K3-32 (32 oz. bottle).....each 23.95 \$CAD

KEMAL-4 (Knobluchs)

Kemal-4 is a relaxer, skin-prep, detergent type degreaser and cleaner all in one. Concentrated and safe to use. Can be used in all soak solutions. Prepare the skin to accept tanning. Relaxes the skin for easier shaving. Softens skins such as African and grease burned skins. Will not cause hair slippage like ordinary soaps because of its low pH. Is about ten times stronger than most dish detergents.

K12-32 (32 oz. bottle).....each 22.95 \$CAD
K12-128 (1 gallon bottle)each 75.00 \$CAD

KEMSOL DEGREASER (Knobluchs)

Kemsol Degreaser acts as a solvent. Mixes with up to 20 parts water. No odor and safe to use. Can be used over again. Works excellent on mammals, birds and fish. Can be used in conjunction with Kemal-4. Compatible with tanning agents.

K13-32 (32 oz. bottle).....each 22.95 \$CAD
K13-128 (1 gallon bottle)each 75.00 \$CAD

RELAX-R (Knobluchs)

Relax R is an oil based skin relaxer that can be used in the rehydrating solution, or can be cut with water and applied directly to the skin.

K5-32 (32 oz. bottle).....each 21.95 \$CAD
K5-128 (1 gallon bottle)each 69.00 \$CAD

Tanning and Chemical Supplies

BM SPORTS DISTRIBUTION is also distributing KNOBLOCHS

SKIN PREP NBU (Knoblochs)

Skin Prep NBU is safe to use, biodegradable, odorless and colorless. Highly recommended for problems which are associated with hair slippage. Use only 1/8 oz. per gallon of solution.

K34-32 (32 oz. bottle).....each 26.95 \$CAD
K34-128 (1 gallon bottle)each 89.00 \$CAD

DEODORIZER WASH (Knoblochs)

Deodorizer Wash is a concentrated wash that removes and masks unpleasant odors in skins such as bear, antelope, domestic sheep, fox, coyotes, goats, etc.

K7-16 (16 oz. bottle).....each 21.95 \$CAD
K7-32 (32 oz. bottle).....each 33.95 \$CAD

STOP SLIP (Knoblochs)

Will permanently set hair that is loose or starting to slip. Also works excellent for setting the velvet on horns. Spray on atomizer or sponge on.

K22-32 (32 oz. bottle).....each 16.95 \$CAD

BIRD FEET INJECTION FLUID (Knoblochs)

A preservative for injecting into bird feet, wings, feet of small game, and antler in velvet to reduced shrinkage. Safe to use without offensive odors.

K23-8 (8 oz. bottle).....each 9.95 \$CAD
K23-16 (16 oz. bottle).....each 16.95 \$CAD
K23-32 (32 oz. bottle).....each 25.95 \$CAD

PROTEX MOUNT CARE (Knoblochs)

For protection of hair, fur and feathers from moth and other insect damage. Safe and easy to use. Won't wash out. This product is used for new mounts or existing mounts. Protex Mount Care is wiped into the air or added to the sawdust in the fur drum. This product is not water soluble.

K30-32 (32 oz. bottle).....each 33.95 \$CAD

PROTEX PRE SOAK (Knoblochs)

A water soluble compound for protection of hair, fur and feathers from moth and other insect damage. Also cleans and conditions hair. This product is used in the last rinse of the tanning process and in the rehydration bath prior to mounting. Concentrated. Use 1 oz. per gallon of water.

K31-32 (32 oz. bottle).....each 55.95 \$CAD

ANTLER IN VELVET (Knoblochs)

Antler in Velvet Tan is a fast acting permanent tanning solution specifically designed to set and tan velvet on antlers. It will not wash out.

K9-32 (32 oz. bottle).....each 20.95 \$CAD

ANTLER STAIN #2 (CHOCOLATE BROWN)

Antler Stain #2 (Knoblochs) is a stain that builds up gradually. It will give a natural chocolate brown color and will not fade. Alcohol base, can be thinned with water.

K20-16 (16 oz. bottle).....each 14.95 \$CAD
K20-32 (32 oz. bottle).....each 26.95 \$CAD

Tanning and Chemical Supplies

TANNER'S SALT (Non-iodized)

The salting process is vitally important for both preventing the hair slippage and preparing the skin for the tanning process. You should thoroughly cover the skin with salt, rubbing it all over and into the entire cape to ensure the penetration. This process will draw the moisture from the cape so lay it on an incline of some type in order to allow the cape drain. An occasional resalting will be required until the cape has sufficiently dried.

*Note: we recommend Tanner's salt (non-iodized) for maximum coverage and penetration.

- SALT-2 (2 kg. bag).....each 7.50 CAD**
- SALT-5 (5 kg. bag).....each 15.00 CAD**
- SALT-25 (25 kg).....each 48.00 CAD**

FINE SALT

Covering the flesh side of the skin with salt will draw the moisture from the cape to set the hair and retard bacterial damage.

- FINESALT-2 (2 kg. bag)each 4.50 CAD**
- FINESALT -5 (5 kg. bag)each 7.50 CAD**
- FINESALT -20 (20 kg)each 15.00 CAD**

BORAX (10 MOL)

Used for cleaning, moth proofing and preserving. Also used in tanning solutions and maché formulas.

- PB5 (5 lb.)each 9.50 CAD**
- PB 25 (25 lb)each 37.00 CAD**
- PB50 (50 lb.)each 68.50 CAD**

BM FISH-TAN

The finest tanning formula on the market for fish. Successfully transforms fish skin into a permanent, stable substance. Contains dry chemical and liquid additive. To aid in the complete dissolving of both products it is recommended to mix the solution with hot tap water and allow it to cool before submerging any fish skins.

- FT-3 (enough for 2 gal.)each 14.95 CAD**
- FT-6 (enough for 5 gal.)each 29.95 CAD**

ZINC SULPHATE

Useful in fish tanning as well as general tans.

- ZS1 (1 lb. bag)each 4.95 CAD**
- ZS5 (5 lb. bag)each 17.95 CAD**

TANNER'S SAWDUST (Grade M1)

A specifically designed, kiln dried hardwood sawdust for the finishing of fur and bird skins. Highest quality in the commercial tanning industry. Grade M1 dries, conditions and polishes. Resin-free.

- M1-5 (5 lb.)each 9.95 CAD**
- M1-10 (10 lb.)each 18.50 CAD**
- M1-25 (25 lb.)each 44.95 CAD**

Tanning and Chemical Supplies

PH TEST PAPER

The acid concentration of your acid bath solution must be controlled between a Ph of 2-3. Dip a small strip of test paper in the solution and match the color tone against the color chart on the roll dispenser. Single roll dispenser.

- PHT-013 (PH range 0-13).....each 15.50 \$CAD
- PHT-06 (PH range 0-6)each 15.50 \$CAD
- PHT-03 (PH range 0-3)each 15.50 \$CAD

CAPE SET

Specially formulated, non-sticking hair setting gel to control unruly hair on game head and mammal mounts. World Champion Sallie Dahmes uses Cape Set on all her deer mounts and suggests applying in the day after mounting a head to control the stubborn hairs on the incision, brisket, etc. Just rub the gel into the hair and allow to dry.

- CT50 (8 oz. bottle).....each 8.95 \$CAD

BLACK SKIN DYE

Fast penetrating, rich black dye that leaves no brittle residue. Excellent for black bear rug work

- DS40 (8 oz. bottle) each 14.95 U\$

POTASSIUM PERMANGENATE

Super product for staining antlers. Dilute 1/2 oz with 32 oz of water and apply sparingly.

- PP-1 (1 oz. bottle)each 4.25 CAD
- PP-4 (4 oz. bottle)each 12.95 CAD

BM ANTLER STAIN

BM Antler Stain is a stain that builds up gradually. The liquid has a purple coloration but it turns to a chocolate brown when it dries. Can be applied with a paintbrush or airbrush.

- BMAS-8 (8 oz. bottle)each 8.00 CAD
- BMAS-16 (16 oz. bottle)each 12.95 CAD
- BMAS-32 (32 oz. bottle)each 22.95 CAD

ANTLER FINISH

Protects antlers of all types. Simply apply on antlers using a paint brush and wipe with a dry towel.

- AFN-250 (250 ml bottle) each 5.95 CAD

MAGNESIUM CARBONATE

Excellent product for making a paste to apply chemical products in specific areas. Used in the taxidermy industry to make a paste with Hydrogene Peroxide (WHITE BONE) for bleaching skulls.

- MCB-12 (1/2 lb) each 7.95 CAD
- MCB-1 (1 lb) each 12.95 CAD

WHITE BONE

White Bone is a 12% Hydrogen peroxide used in conjunction with Magnesium Carbonate, mixed to a thin paste consistency and painted on bones.

- WB-8 (8 oz).....each 6.00 CAD
- WB-16 (16 oz).....each 10.00 CAD
- WB-32 (32 oz).....each 18.00 CAD
- WB-128 (1 Gal) each 50.00 CAD

SKULL FINISH

Seals, glue and protect skulls. SKULL FINISH gives skulls a nice finishing touch. It also protects bones from yellowing and makes it easier to clean.

- SF-8 (8 oz).....each 5.50 CAD
- SF-32 (32 oz).....each 13.95 CAD

Airbrushes and Painting Accessories

PAASCHE AIRBRUSHES

H3 AIRBRUSH KIT

Single-Action External-Mix

RECOMMENDED USE

The perfect Airbrush for hobbyists, ceramists, architects and leather crafters. The H Airbrush is dependable and adaptable for practically any hobby or professional use.

COMPONENTS

The H3 is packed complete with:

*H-1/4-oz Metal Color Cup (7cc)

*A-34 Hanger

*F-186 Wrench

*V-62 Wrench

*TTALB "22 Airbrush Lessons" Booklet

*Parts Sheet

H#3each 83.00 \$CAD

VL DOUBLE ACTION SIPHON FEED

Double action airbrush with a single button control permitting flexibility of air and color action. A precision instrument complete with all Multiplehead (Nozzle) and Needle sizes. Packaged for instant hook-up to air source, extra fluid containers included.

VL-SETeach 160.00 \$CAD

TG TALON DOUBLE ACTION AIRBRUSH GRAVITY FEED

Prime characteristics of the Paasche Talon Airbrush include the ability to spray fluids requiring gravity feed doing fine detail and shading work. The double action, Internal mix feature permits flexibility in regulation of color and air without work stoppage.

TG-SETeach 205.00 \$CAD

D500SR AIR COMPRESSOR (1/8 H.P.)

Economical and suitable for all airbrushes spraying properly thinned fluids. Maximum 20-35 PSI operating pressure depending on airbrush being used. The Paasche D500R is an oilless piston unit and comes with the R-75 Regulator/Filter with gauge. It operates on 110-120 Volt, 1 phase, 60 Hz, and delivers 0.4 C.F.M. @ 20P.S.I R-75 Regulator will regulate up to 35 PSI. depending on usage (intermittent or constant) and size of airbrush being used.

D500SReach 240.00 \$CAD

DA400R AIR COMPRESSOR (1/6 H.P.) Twin cylinder

1/6 HP Piston Compressor with Auto shutoff. Compressor shuts off when airbrush is not use. Regulator and Moisture Trap included. Operating pressure up to 35-50 PSI depending on airbrush being used.

DA400Reach 385.00 \$CAD

Airbrushes and Painting Accessories

PAASCHE DETAILING PEN

The Flow Pencil is easy to control and operate. The best paint tool for detailing fish scales and dots. No air compressor needed.

FPT1-32each 89.00 \$CAD

PAASCHE PRESSURE CUP

(For Paasche Detailing Pen)

To be used with the Paasche Detailing Pen for heavy consistency material as Mud Pudge. Use it for embossing your deer noses. Save time.

ALP-32.....each 29.95 \$CAD

PAASCHE 62 SPRAYER UNIT

This is an economical alternative to a touch-up gun for sealing and glossing fish mounts. It's sometimes called the "poor man's" gloss and sealer sprayer and glazing gun. The spray pattern cannot be adjusted, but it will deliver enough liquid to obtain a satisfactory gloss. Includes 3 oz. capacity bottle. (Airbrushes will not deliver enough liquid to produce an acceptable gloss-when spraying the gloss coat on a fish, it must look wet and shiny all over).

62- 1- 3.....each 64.00 \$CAD

PAASCHE TOUCH-UP GUN

A top of the line paint sprayer used in the auto industry for touchup and special design finishing. Also used by artists and illustrators for those extra-large projects that require wide spray and lots of paint. Combines the intricate control of an airbrush with the spray rate applicator of a standard paint sprayer. Excellent gloss gun. Can't miss with this one.

AUT-Feach 150.00 \$CAD

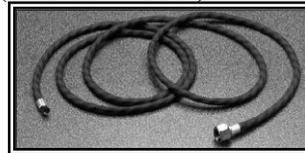

HOSES

10 FOOT AIR HOSE (Gloss Gun and Compressor Model)

Paasche 10 foot 3/16" - 1/4" air hose with couplings. Yellow and black braid. Fits Paasche 62-1-3, Paasche AUT-F and TSG-1 gloss sprayers. Also fits standard connector on most popular compressors

HL-3/16"-10 (10 ft. hose)..... each 23.50 \$CAD

AIR HOSE (Airbrush Model)

Six and ten foot long air hose. Braided cloth over rubber tubing, 1/4" fitting for air supply with Paasche airbrush coupling at other end.

A-1/8"-6each 14.25 \$CAD

A-1/8"-10each 20.95 \$CAD

AIR HOSE WITH ON-LINE MOISTURE TRAP

Air hoses as described above with a 2" long filter unit installed near the airbrush end of the hose. Removes water and impurities from the air line before reaching airbrush and mixing with paints. A must when airbrush painting in a humid environment.

A-1/8"- 6 MT..... each 39.00 \$CAD

A-1/8"- 10 MT..... each 45.00 \$CAD

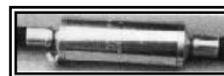

10' PLASTIC COILED AIR HOSE W/COUPLINGS

Sturdy and lightweight, this hose has a retractable action which keeps it from getting under foot. Available in 10' lengths ONLY. The coupling at the airbrush end is fitted with an "O" ring to prevent leaks.

CH-10.....each 21.00 \$CAD

MOISTURE TRAP

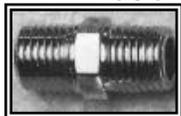

Same moisture trap as above but without hose. Fits directly onto air line. Includes 2" filter with handy thumb screw drain.

MT.....each 22.00 \$CAD

Airbrushes and Painting Accessories

PAASCHE AIRBRUSH ACCESSORIES

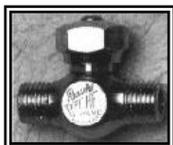

1/4" MALE TO 1/4" MALE COUPLER

For use as an adaptor between two air hoses or to convert a female outlet to a male.

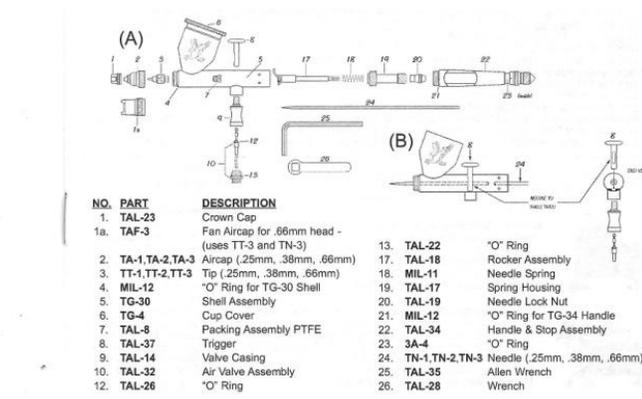

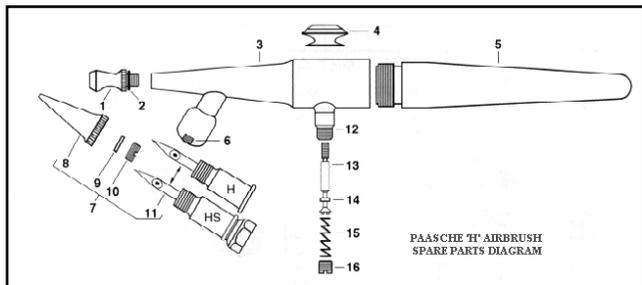

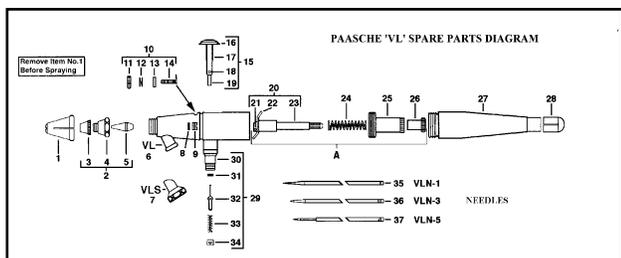

HF33 Male Couplereach 1.95 \$CAD

1/4" MALE TO 1/4" MALE VALVE

This valve provides shut-off of the air source within the air line.

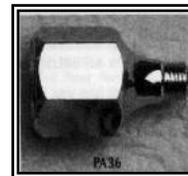

HF-1/4" Valve Assemblyeach 7.95 \$CAD

AIRHOSE ADAPTORS

PAASCHE HOSE TO 1/4" SPRAYER

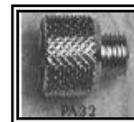

Converts Paasche airbrush hose to standard 1/4" female coupler for operating touch up spray guns or air tools.

DB-40 Adaptereach 7.95 \$CAD

PAASCHE HOSE TO IWATA AIRBRUSH

Converts Iwata airbrushes to use Paasche airbrush hoses.

A-188 Adapter.....each 6.50 \$CAD

PAASCHE HOSE TO BADGER AIRBRUSH

Converts Badger airbrushes and Thayer and Chandler airbrushes to use Paasche air hoses.

A-151 Adapter.....each 6.50 \$CAD

BADGER HOSE TO PAASCHE AIRBRUSH

Converts Paasche airbrushes to use Thayer and Chandler or Badger air hoses.

M-66 Adapter.....each 6.50 \$CAD

Bird Forms

BIRD BODIES

Mallard body

A high quality bird mount begins with high quality bodies. Joe Ferebee bird bodies meet this criterion. Constructed with a high quality foam, they provide good stability yet allow easy wiring. Use in conjunction with Ferebee artificial heads and bills or with the flexible game bird heads and necks. Producing a quality bird mount has never been easier.

Reproduction Fish Heads

Robert Kennedy's Fish Heads

These top quality open-mouth heads are easy to use and help you to create a more professional-looking permanent mount. These lightweight heads are hollow for easy attachment to commercial mannikins or hand-carved forms. All heads feature pre-set eye sockets and full mouth interiors. Use these artificial heads to eliminate grease bleed-through problems, shrinkage, and rebuilding problems, odor problems and drying problems.

Artificial Fish Accessories

LAKE COUNTRY REPLICAS ARTIFICIAL FINS

Without a doubt the most realistic fins available to the taxidermy industry!

Lake Country Replicas' fins are thin and molded from real fins. They are light and flexible but with good resiliency. The fins are water clear, translucent and have excellent paint adhesion. These fins can be shaped with heat and will hold their shape.

Length refers to the overall length of the fish.

CRAPPIE FINS

Item #	Length	Price (set)
CBK12-13-FS	12"-13"	29.00 \$CAD

EARLINERS

EPPLEY 360 DEGREE EAR SYSTEM

This revolutionary new system guarantees an anatomically accurate ear position as well as proper placement of the earbutt muscles. These products enable professional taxidermists the ability to achieve competition quality earbutts on commercial mounts in less time than ever before imagined. This earbutt system is engineered to be simple and strong. It saves money in time and effort. The use of very little or no clay translates into faster drying time and a quicker turnaround for today's demanding clients

Eppley 360 Degree Earliners

This innovative idea is on the leading edge of whitetail ear technology. The 360 degree ball fits directly into the ear canal and can then be rotated to any ear position properly and quickly. These earliners are injection molded from a flexible, translucent, and durable plastic. The location ball can be used with the locking base (below) or simply cut off for conventional use. The location ball aids in keeping the ear properly located on the head and the ears can be posed in any position desired. The inner ear is large enough to accept the cartilage bowl of the inner ear, saving you time in skinning and finish work.

- EL360S (Small 5 1/2 x 2 3/4)..... pair 9.95 \$CAD
- EL360M (Medium 6 x 2 7/8) pair 9.95 \$CAD
- EL360L (Large 6 1/2 x 3 1/8)..... pair 10.25 \$CAD

Eppley 360 Degree Base

This base is designed to lock the 360 degree earliners into place, allowing the ear to be properly rotated to the discretion of the taxidermist. Manufactured from rigid urethane and pre-drilled for attachment. Provides a fixed location and pivot point for the ear which allows the ears to be posed in any attitude without losing anatomical location. Minimal grinding is required on forms to allow the location ball of the ear to snap in place. Attaches with screws (not provided). One Base size fits all sizes of 360 Degree earliners.

- ELL360B (fits all sizes)..... pair 2.95 \$CAD

Eppley Earbutts (choice of 3 positions)

These ears back earbutts are made to fit the Eppley 360 degree earliners, with the ball at the base snapped off and removed. They can also be used with conventionally mounted Bondo (bonded ear method) ears. They are manufactured from rigid urethane and designed for a positive fit when matched with the proper size of earliners.

Eppley Ears Forward Earbutts

- ELS360EF (Small Ear Forward Butts).....pair 6.95 \$CAD
- ELM360EF (Medium Ear Forward Butts)..pair 6.95 \$CAD

Eppley Inner Ear Inserts

Rigid urethane inner ear inserts molded in flesh color to give a finished look to the the 360 style earliner. Snaps in place to provide a detailed replica of the inner ear canal.

- ELS360I (for EL360S).....pair 3.95 \$CAD
- ELM360I (for EL360M).....pair 3.95 \$CAD
- ELL360I (for EL360L).....pair 3.95 \$CAD

Jaws, Ears and Noses

EARLINERS

EPPLEY EAR-TECH SYSTEM

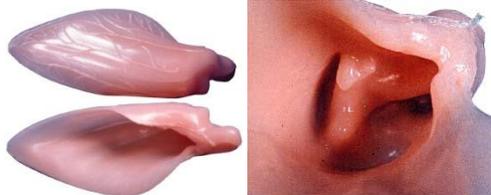

Eppley Whitetail Earliners

This new series of earliners sets a new standard for quality commercial earliners. Manufactured from a special translucent flexible plastic, they are the proper thickness and the exact shape for competition work. Molded with ear butts in place (in a forward alert position) these new liners will also save you time.

ELE02 (Medium) pair 10.50 \$CAD

Eppley Whitetail Earliners With Inner Ear Detail

These outstanding plastic earliners do not include the earbutt for freedom in posing. The inner ear detail is completely molded in, so no skin or cartilage is required. Translucent pink color with veins on outer ear.

ELC02 (Medium) pair 12.50 \$CAD

Eppley's Earbutts For ELC02 Earliners

Now customers who love the ELC02 earliners have the added convenience of Eppley's pre-sculpted earbutts for speed and accuracy.

ARTIFICIAL NOSES

Professional taxidermists constantly depend on their ingenuity to save time and money. Along with their ability to produce quality work, time/costs savings are their keys to success. Think about the time it takes to flesh out the real nose, fit it to the form and then reconstruct it to the natural look with an epoxy. Believe us we have tried these noses and we really can't say enough about the quality of the finished look. These noses are exact in every detail and once painted they surpass the natural look of any reconstructed nose

SPEED SEPTUM SYSTEM

From taxidermist Boxie Kallina comes this new idea for creating artificial septums that is easy, inexpensive, and looks great! Works on any whitetail sized animal. Kit includes instructions, special tool and enough Speed Septum material to do 20 heads

SS20 - Kit.....each 80.95 \$CAD
 S10 - 10 Small Septumseach pkg. 34.00 \$CAD

NICTATING MEMBRANES

These nictating membranes will enhance the realism of your eyes in competition work. They are not normally used in commercial work but if you have a special trophy that you want to give a quality finish, try these. NM-3 are designed for small mammals, boar and bear. NM-5 may be used for whitetail, mule deer, antelope, sheep, etc.

NM-3 (Fits 12-22mm eyes)pair 3.50 \$CAD

Habitat

ENVIROTEX LITE (EPOXY RESIN)

(This product was replaced by BM Polymer)

This products is the latest rage for creating crystal clear water scenes, especially "pools". Although originally designed for cypress clocks, bar tops, etc. several enterprising artists have incorporated them into habitats. To build one, the base must be sealed with fiberglass resin, Ultra Seal, or similar substance. This will eliminate air bubbles. Once the sealer has dried, mix Envirotex Lite components 1 to 1 as called for in the directions and make the first pour. Don't try to obtain too much depth with one pour. Instead, pour approximately 1/8" to 1/4" and let it cure and then pour again until a maximum depth of 1/2" is reached. Trying to pour thicker coats than this will result in distortion, etc. Air bubbles may be removed by slightly blowing on them or putting a torch to them as per directions on container. Additionally, grasses, leaves, duckweed, etc. can be imbedded BETWEEN the layers of resin for very interesting effects.

- EV16 (16 oz. kit)each 20.75 CAD
- EV32 (32 oz. kit)each 36.50 CAD
- EV64 (64 oz. kit)each 60.50 CAD

TONGUE DEPRESSORS

Medical grade 6"x3/4" wooden tongue depressors for stirring resin mixtures, fillers and paints. Paint must be "stirred" not just shaken for consistent colors and smooth airbrushing.

- TD100 (approx. 100 depressors)each 12.00 \$CAD

DISPOSABLE BRUSHES

3/8" by 5 1/2" handy disposable brushes. Metal handle. Use when working with epoxies or resins.

- BRU (1 doz.)each 3.75 CAD

SNOW FLOCKING

This material is applied with a flocking gun or misting water with a handsprayer and sifting or sprinkling the snow over it. It has an adhesive in it that is activated when it is mixed with water. This snow is a finer diameter snow than the Artificial Snow (The most accurate habitat scenes contain at least two textures of snow.)

- ASF1 (1 lb. bag)each 17.50 \$CAD
- ASF25 (25 lb. bag)each 209.95 \$CAD

ARTIFICIAL SNOW

This material is applied by first spraying with Spray Adhesive Glue, misting water-thinned Fin Backing Cream, or Ultra Seal and then sprinkling the snow over the glue with a can with holes punched in the top. This operation can be repeated several times until the desired thickness is reached

- HM600 (1/4 lb)each 10.95 \$CAD

POLYTRANSPAR DIAMOND DUST

This adds an extra "sparkle" to snow habitats and ice scenes. It just takes a very small amount of sparkle sprinkled on snow habitats as a last step.

- DD (1 oz. container)each 7.95 \$CAD

Habitat

PLANT LIFE PRESERVATIVE

Here it is! The preservation solution for natural grasses, shrubs, flowers and small trees up to six feet tall. Plant Life Preservative permanently preserves plants, keeping them soft and realistic, while dyeing them in bright, non-fading colors from the inside out. Plant Life Preservative can be used on moss, cottonwood, cedar, cattails; you name it! The easy-to-use formula will do wonders to enhance the realism of your habitats. Shipped pre-mixed and ready to use. Simply shake, pour into an open container, and place the stems of your freshly cut plants in the solution. In one to six days (depending upon the size and complexity of the plant), the Plant Life Preservative will be absorbed through the stem into the leaves, removing all the natural sugars and replacing them with a permanent preservative. Plant Life Preservative is available in eight colors; yellow, orange, red, blue, light green, dark green, brown and clear. You can use fresh-cut tree branches, preserve and dye with the yellow or red solution and give your plants an autumn look forever. You can freely intermix the colors to produce any custom color. The limit is your imagination!

- PLP110 (Yellow) (16 oz) 10.95 \$CAD
- PLP310 (Red) (16 oz) 10.95 \$CAD
- PLP410 (Blue) (16 oz) 10.95 \$CAD
- PLP610 (Dark Green)..... (16 oz) 10.95 \$CAD
- PLP710 (Brown)..... (16 oz) 10.95 \$CAD
- PLP810 (Moss Green)..... (16 oz) 14.95 \$CAD

GLYCERINE

This product is often used to preserve various plants, pine needles, etc., by soaking them in a solution of 50% glycerine and 50% isopropyl alcohol. This solution replaces the moisture in the plant and effectively preserves many species.

- GL (16 oz. bottle)each 9.95 CAD

JIM HALL MACHE AND SALLIE DAHMES MACHE

These are ideal maches that can be used for a multitude of projects and base work. Sallie Dahmes Mache contains more adhesive and is somewhat stronger than Jim Hall Mache. Jim Hall Mache is slightly lighter in weight and accepts pins more readily. Both can be mixed with Tempera Paints to add color. Hardening times will vary according to water temperature and length of time the product was mixed. As a rule, warm temperatures and mixing long periods of time will decrease the "set" time.

JIM HALL MACHE

- JHM1 (1 lb. bag)each 5.95 \$CAD
- JHM5 (5 lb. bag)each 15.95 \$CAD
- JHM10 (10 lb. bag)each 26.95 \$CAD

SALLIE DAHMES MACHE

- SDM1 (1 lb. bag)each 5.95 \$CAD
- SDM5 (5 lb. bag)each 15.95 \$CAD
- SDM10 (10 lb. bag)each 26.95 \$CAD

Panels

Save money and finish your own log slabs using professional products.

BM POLYMER COATING (Formerly known as Envirotex)

This is the original high gloss polymer coating which produces a glass-like premium high gloss plastic finish. Designed for interior use. BM Polymer is an epoxy-based reactive polymer compound, that will only cure after its two components have been thoroughly mixed together. It may be poured or brushed with one coat equal to 50 coats of ordinary varnish or lacquers. The finish will self-level. BM Polymer is used by BM Sports for a Super coating effect on Log Slabs. Always use the Wood Sealer before applying BM Polymer.

EV16 (16 oz. kit).....each 20.75 CAD\$
EV32 (32 oz. kit).....each 36.50 CAD\$
EV64 (64 oz. kit).....each 60.50 CAD\$

Wood Sealer (acrylic)

Manufactured and used by BM Sports to seal Log Slabs. After 2 or 3 coats, you will be able to apply a coat of Envirotex or an acrylic varnish. If you're not using Wood Sealer, the wood will absorb the Envirotex and you will have to do it again.

WS-8 (8 oz.)6.50 CAD\$
WS-16 (16 oz.)10.50 CAD\$
WS-32 (32 oz.)15.95 CAD\$

Log Slabs (Balsam Poplar)

Offered in 3 different finishes. Please specify when ordering Our 8" X 12" are perfect for deer antlers. The 13" X 18" are preferred for moose antlers mount. The 19" X 25" will fit for an average deer shoulder mount.
